DD/A/ODP WEEKLY REPORT

Week of 25 March - 2 April 1981

I. Major Activities During the Past Week:

A. Support to OC:

MAINS (Management Information System) The Office of Communi-
cation has completed acceptance testing of Phase I of MAINS.
MAINS consists of a GIM data base containing station information
and circuit efficiency traffic statistics for each station in the
OC communications network. 25X1

B. Support to OCR:

AUTODIR (OCR Automated Directories) The Near East/South Asia
(NS) segmented file has been added to OCRDIR data base as the 16th
country organization. 25X1

25X1 C. Support to PTO: 25X1

CAMS (COMIREX Automated Management System) The Dual Mode
interface/regression testing activities have culminated this week
in the successful completion of the most extensive testing of
software, hardware and communications facilities experienced to
date in the CAMS project. 25X1

D. Support to OGSR:

CARTDEV (Development of New Cartographic Programs) Chief, B
Division was briefed on Carto-Graphic Division facilities and ADP
plans. The Chief, Carto-Graphic Div. asked to have their FY '81
contribution to the IBM contract ($35,000) de-obligated since a
new analyst would not be on the project until FY '82. 25X1

25X1

E. Support to OL:

FARS (Federal Automated Requisitioning) The Users are con-
tinuing with their final acceptance testing of the FAR system.
SAB/OL is still coordinating with Data General and DATEX personnel
to resolve the remaining communications problems. We hope to
25X1 resolve them this week.

CONFIDENTIAL

ETECS (Electronic Text Editing and Composing System) The Bi-Sync data link was tested 17 and 20 March. SCRIPT files were converted to ETECS format and transmitted over the data link with only one minor format problem. ODP/SPD will work on this problem during the next week.

25X1

P&PD Support. Work is underway to copy WANG word processor output onto an IBM compatible tape using a MITRON device. The tape will be used to input the data to VM for transmission to ETECS. Record length problems are being addressed by representatives of MITRON.

25X1

F. Support to OF:

ACIS (Automated Compensation and Information System) The new payroll system project team was organized this week. The team

, OF. Orientation meetings were held, project methodology decided, and tasking allocated for: (1) the Functional Requirements Document, (2) the Project Development Plan, (3) the Interface Control Documents, and (4) the Master Data Elements List.

25X1

II. General Items:

The RFP and Evaluation Plan for B Division Software Maintenance Support went through a formal document review this week. Several minor changes were recommended, but the documents otherwise passed review. A time table has been established for RFP activities through award, projected for 1 August 1981.

25X1

III. Personnel Items:

25X1 has returned for his third co-op period with A Division.

His address: 2D0105 Hdqs.,
